

## SCIENCE NOTEBOOK EVALUATION SHEET

**STUDENT NAME** \_\_\_\_\_ **DATE** \_\_\_\_\_

For each descriptor below, write the points on the line if present, 0 if not.

| <b>Points</b> | <b>Student</b> | <b>Teacher</b> |   |
|---------------|----------------|----------------|---|
| <b>Each</b>   |                |                |   |
| 2             | _____          | _____          | 1. Every entry includes all of the following:<br>Date Day # Observation #<br>Research Question Topic Name                               |
| 1             | _____          | _____          | 2. Every entry has a diagram with all of the following:<br>Title Labels Measures<br>Counts Time Vocabulary<br>Scale Color Close-up Neat |
| 2             | _____          | _____          | 3. Every description and narrative is clear, accurate, thorough, informative, and legible.  |
| 5             | _____          | _____          | 4. Organism behavior is described with examples.  |
| 3             | _____          | _____          | 5. Conditions/procedures of research are listed, explained, and reasoned.   |
| 5             | _____          | _____          | 6. Change and growth of organisms is documented and described.  |
| 10            | _____          | _____          | 7. Supporting evidence/data is provided for every statement.  |
| 2             | _____          | _____          | 8. Representations of data are appropriate, accurate, informative, clear, and neat.   |
| 2             | _____          | _____          | 9. Notetaking from class discussions and observations is accurate, thorough, informative, and legible.                                  |
| 3             | _____          | _____          | 10. Weekly summary of work is present and includes all of the following:  |
| 1             | _____          | _____          | a. What was done during the week.   |
| 1             | _____          | _____          | b. What happened during the week.   |
| 1             | _____          | _____          | c. What was learned from the above.   |
| 1             | _____          | _____          | d. Data and observational evidence collected.   |
| 1             | _____          | _____          | e. Organization of data provided.   |
| 1             | _____          | _____          | f. Information interpreted.   |
| 1             | _____          | _____          | g. What is now known about question.  |
