

Drawings from Procreate

Art Witulski

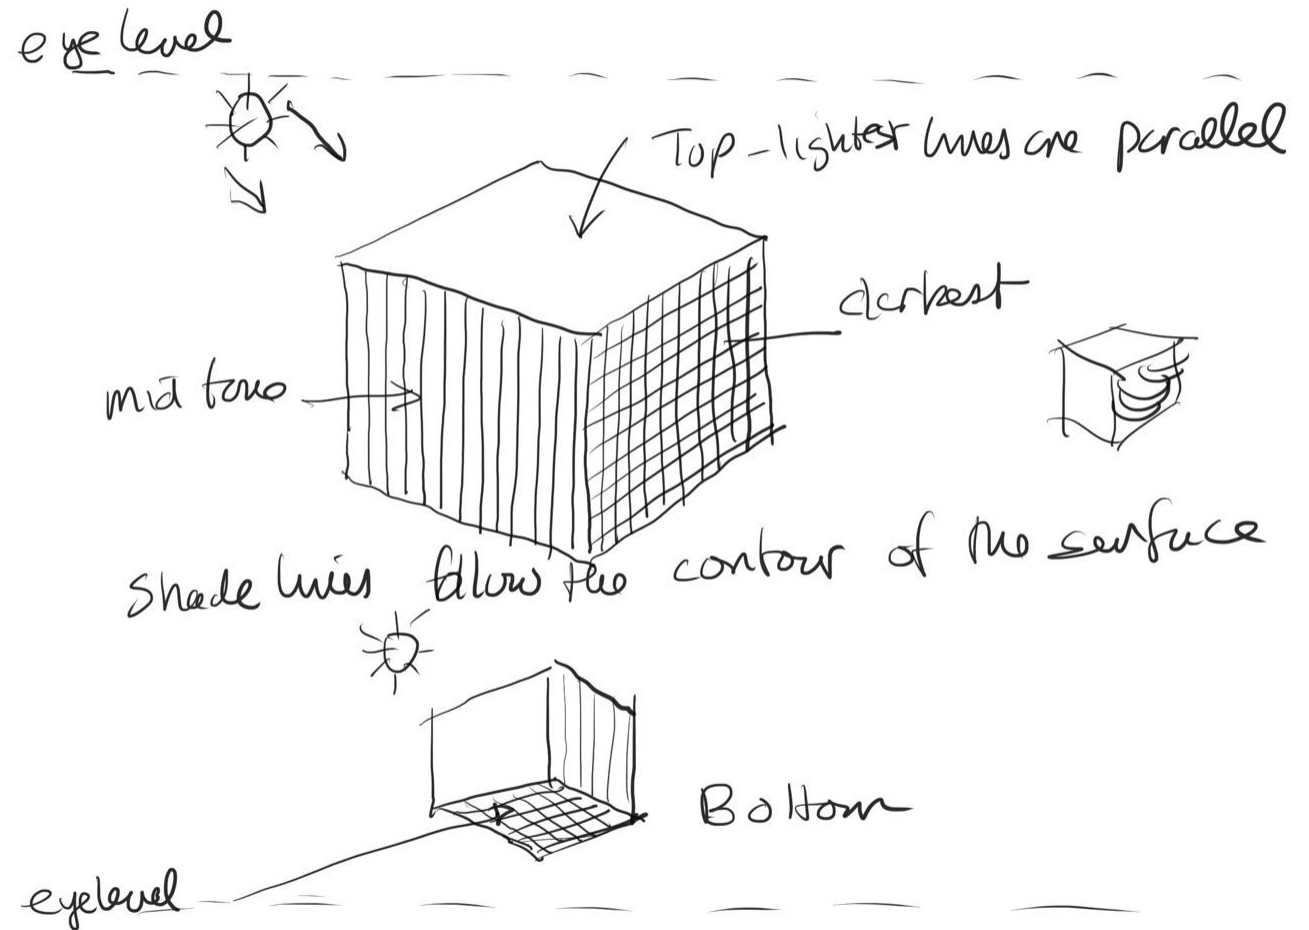

OLLI 01/18/22

Value Scale

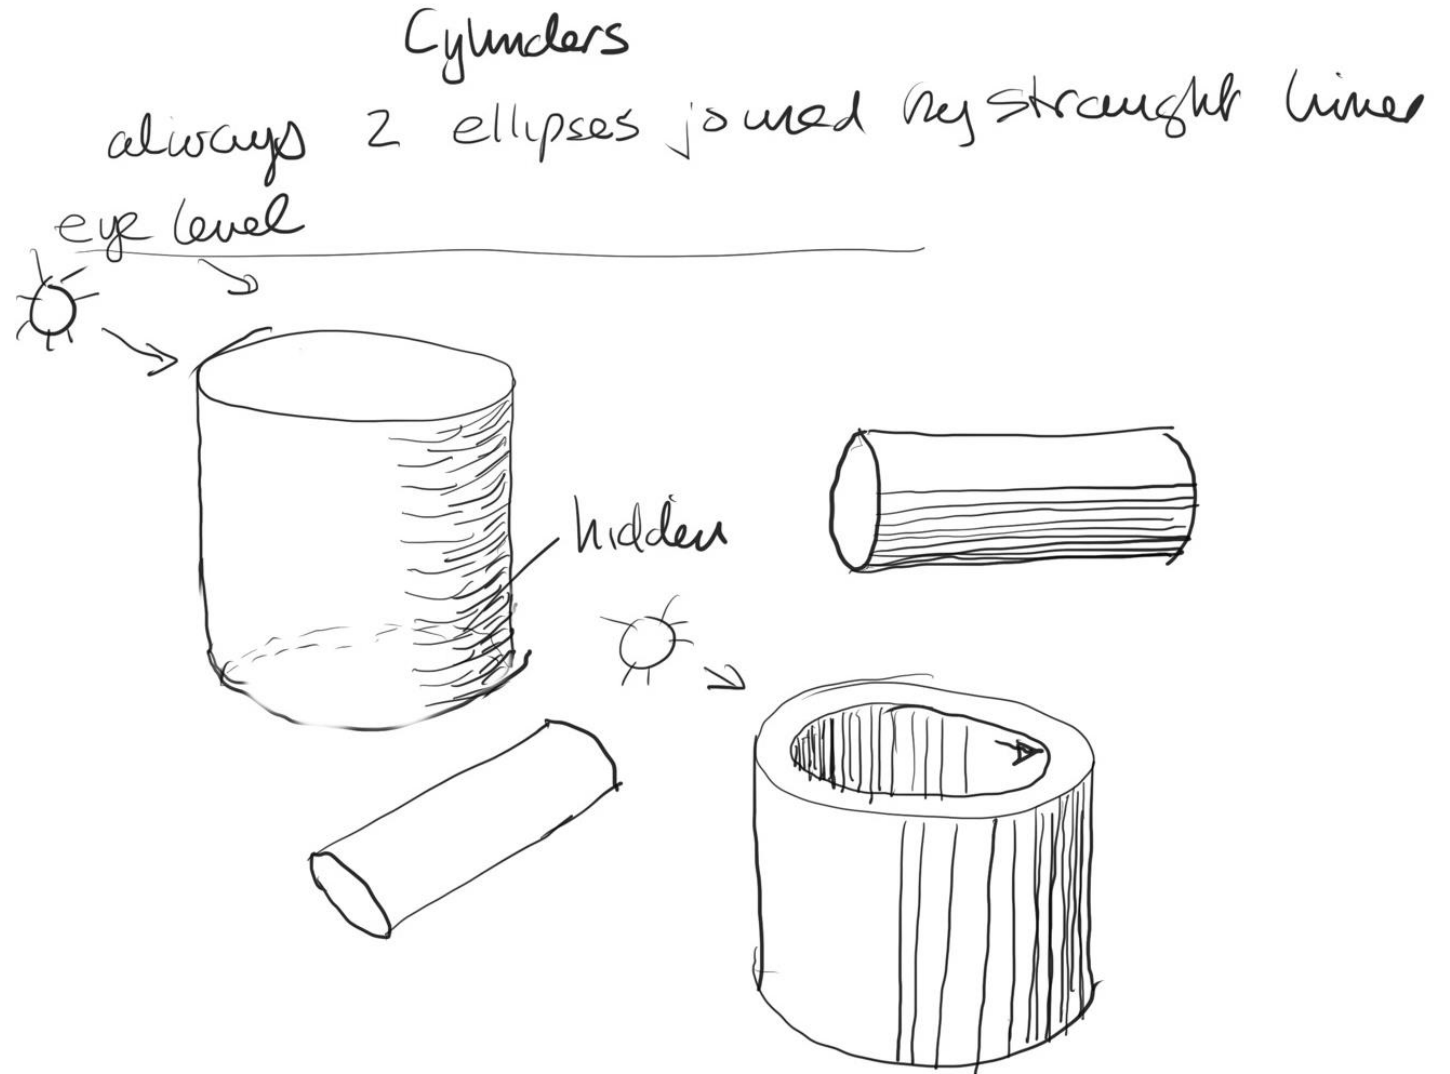

Try making a value scale with both pen and pencil (or charcoal, if you have it).

Ideal Box

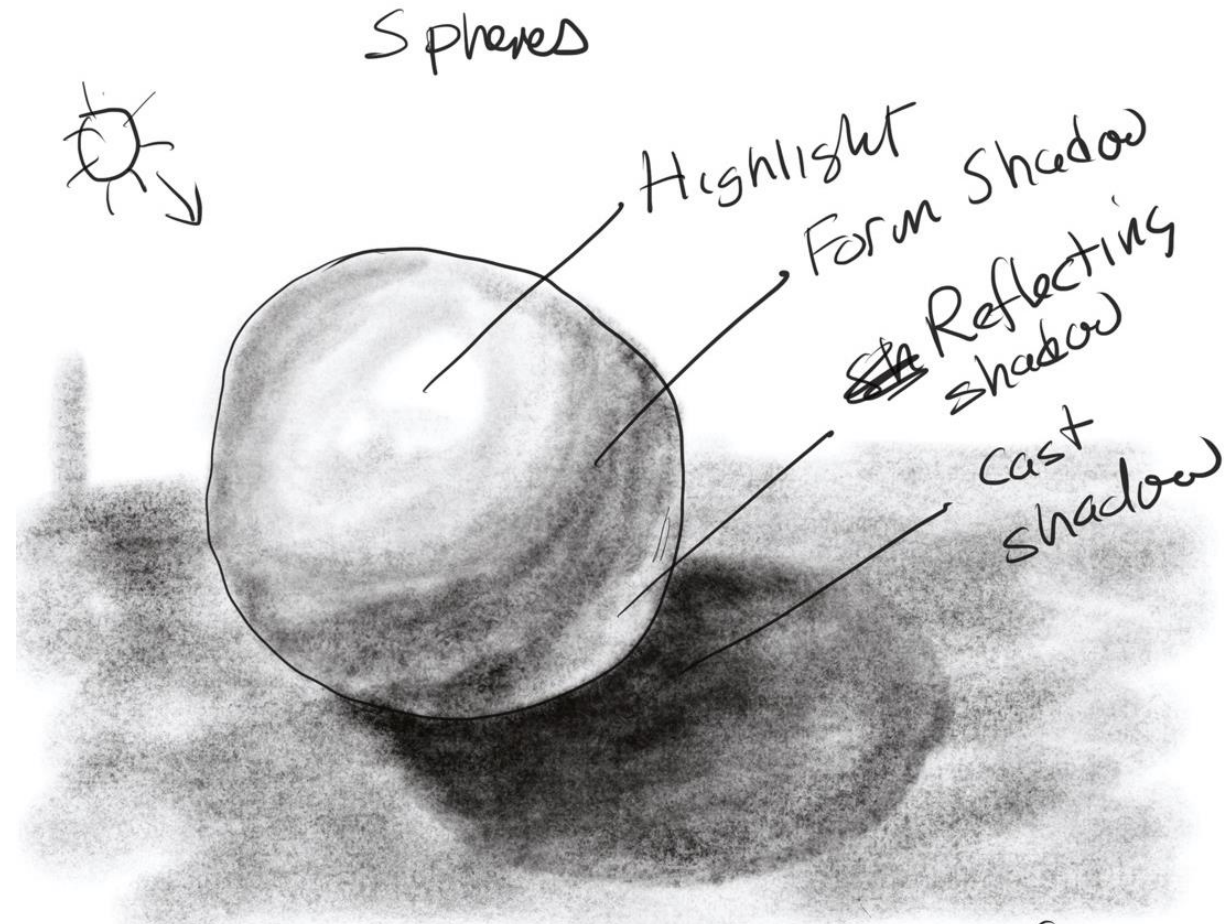

Try drawing box forms from all sorts of angles. Use something like a Kleenex box as a reference.

Ideal Cylinders

Try drawing cylinders from all sorts of angles and shading them.
Use something like soup can or shampoo bottle as a reference.

Spheres

Form established by gradation of value (shadow).

I added the shading for the table after class, so it didn't seem like the sphere was floating in space
Also darkened the cast shadow just under ball so it seemed more anchored to the table
Try drawing and shading spheres in different lighting situations
Use balls, marbles, etc. as references
